

AGAFLOR POT

AgafloR is a **rectangular pot** with an outline in the shape of a regular wave. The characteristic shape of the elements allows you to **freely compose AgafloRs with each other and the surrounding space**. The pot looks great in **private gardens and urban spaces**.

APPLICATION

The design elements of green architecture (flower beds), strengthening slopes and retaining walls.

USEFUL RECOMMENDATIONS

Installation in accordance with the construction practice, in the case of strengthening embankments, successive layers are to be shifted half the width. In the case of the construction of a retaining wall with a the height above 1 m it should be only used as the lost formwork for footing the reinforcement inside and filled with concrete. Concrete quality and amount of reinforcement, and the footing bench must be specified in the technical design.

SPECIAL FEATURES

A rectangular pot. Outer outline in the shape of a regular wave, internal outline – straight. The shape allows almost any composition of AgafloRs with a precise fit for each other. There is no bottom. ATTENTION: For technological reasons pallet's weight may change.
