*on order products

Claro flat caps are elements used to finish walls, posts and foundations made of hollow blocks from the collection. In addition to their decorative function, they serve an important protective function. They protect walls and posts from weather conditions (rain, snow). **They come in two formats: 80x40x8.5 cm and 80x20x8.5 cm.**

Fencings made of concrete hollow blocks are characterized by high durability and easy mounting, and thus – great time savings. Their high aesthetic values result from the applied manufacturing technology – the process of concrete vibro-pressing ensures high precision of built.

USAGE

For finishing and protection of walls and posts from harmful weather conditions.

USEFUL RECOMMENDATIONS

Mounting on frost-proof glue. Sealing with silicone necessary. Installation after a minimum of 2 days from the time of filling the walls and pillars with concrete. Recommended impregnation with an agent protecting against dirt accumulation and moss overgrowth after a minimum of 30 days after completion of the installation work. In case of unevenness, grind the upper surface of the hollow block to ensure that the canopies are precisely adhered to the blocks below.

SPECIAL FEATURES

To be used together with the Claro fencing system hollow blocks. Available in two dimensional versions adapted to the dimension of the hollow blocks. It does not protrude beyond the outline of the hollow block.

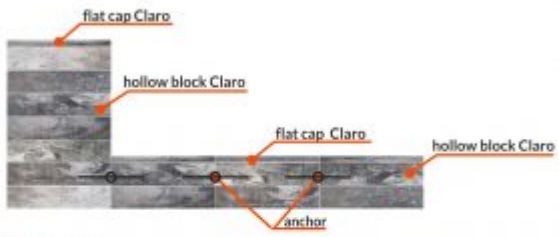

* NOTE: due to technological reasons, the weight of the pallet is subject to change.
